AIRNow-International Status and Next Steps
Use of AIRNow-International in Shanghai

- Ingest of data into AIRNow-I Data Management System (DMS)
- Quality control with DMS
Use of AIRNow-International in Shanghai

• Map generation with AIRNow-1 Information Management System (IMS)
Use of AIRNow-International in Shanghai

- AIRNow-I products provided to the Expo
About AIRNow-International

• Goals of AIRNow-International
  – Exchange environmental data internationally
  – Make advances in air quality knowledge and applications
  – Build a community of people and organizations

• AIRNow-I software – same as U.S. system

• Launch - May 20, 2010 at the Shanghai Environmental Monitoring Center for the 2010 World Expo
Administrator Lisa P. Jackson, US Environmental Protection Agency
Visiting the Expo 2010 Shanghai, 13 October 2010
“China has made remarkable efforts to protect the environment and create a more sustainable economic future in the past decade, including important gains for cleaner air.”

“We’re proud to share that experience to help build strong partnerships and clean air efforts here in China.”

“We can learn together new methods to clean up the air we breathe.”
Next Steps for AIRNow-I

Shanghai
- Technical WebEx trainings

• Asia
- Workshop at Better Air Quality Conference in Singapore, 8\textsuperscript{th} November 2010

• Mexico
- Technical demonstration of AIRNow-I capabilities
- Technical assessments
