

GEO-XII and 2015 Ministerial Summit
9-13 November 2015, Mexico City, Mexico

Side Events on Citizen GEOSS
10th November, Hotel Hilton, Room Dona Sol

Summary: The side event will feature live demos of the mobile and web-based applications developed by the different teams and include a panel discussion addressing the challenges, opportunities and barriers for the successful exploitation of open data and the integration of citizen observations into GEOSS, including technical interoperability, data management, open access, and long-term sustainability. In particular, the event will emphasize relevant results from the OGC Architecture Implementation Pilot- 8, and the winning applications of the MyGEOSS first call for innovative apps addressing citizens' needs. This GEO event will also discuss latest development in citizen-based observation techniques and volunteered geographic information applications and their potential integration into GEOSS.

Draft Schedule
