

# GIS for a **Sustainable World** Conference

2 - 4 May | Geneva, Switzerland

## **GIS for a Sustainable World Conference | applied geography for a better future**

**May 2-4, 2016, in Geneva, Switzerland**

When you commit to something, you give it your all. With the 2030 Sustainable Development Agenda firmly established, your organization will make no exceptions -- you're focusing your efforts on making the world a better place - through inclusive, efficient and climate-smart development.

As you prepare your organization's strategies for working to achieve the SDGs, plan to attend the GIS for a Sustainable World Conference, to be held May 2-4, 2016, in Geneva, Switzerland. This event will explore how your organization can use geospatial technology to meet the SDG Goals and Targets. Hear from your colleagues about how intelligent maps and spatial analysis can change the outcomes for migration, sustainable development, climate change, and more.
