

GEO Data providers workshop 20, 21 April 2017, Florence, Italy

Data provider short description:

The Federal Agency for Cartography and Geodesy is responsible for the German geospatial data catalogue and also provides a metadata information system with regards to the national GEO community.

How do you contribute to the GEO Vision?

The Federal Agency for Cartography and Geodesy contributes by two different catalogues. First, the catalog of the German Spatial Data Infrastructure (GDI-DE) focusing on administrative data and, second, a special catalog dedicated to GEO-specific datasets including scientific data repositories.

Type of organization: Federal Agency

Type of data: Very heterogeneous

Data policy adopted by your organization: None

Already brokered or not by the GCI: Yes

For already brokered data providers

- *It is necessary to develop a concept that prohibits duplicates in the GEOSS Portal.*
