NGO

***Type of data: Thematic description***

Environmental

***Data policy adopted by your organization:***

Various

*Already brokered or not by the GCI,*

***For newcomers:***

- ***Why you are interested to join GEO and what you expect back.”***

*We are exploring how we might be able to support GEO, our work with [WWF-SIGHT](#) provides a novel example of how GEO data can be utilised to help protect natural resources and provide accountability. We hope we can provide insights into how WWF uses this data to leverage real world change and some of our key constraints. However, our capacity to be a data provider to GEO is extremely limited due to legal reasons outside our control.*
