

PERU – Comments

Submitted via e-Mail

Dear Secretariat

Greetings from Peru

I am writing on behalf of GEO Principal from Peru, Peruvian Air Force Major General Jose García, to submit our comments about the open items

1. Regarding the future of the Global Earth Observations System of Systems (GEOSS) Platform, we consider the expert advisory group has finished its job and the Secretariat may provide to ExCom a recommendation considering the information provided by EAG
2. Regarding the Post 2025, we support the following initial considerations:
 - a. Optimize the GEO Work Programme: focus on a limited number of prioritized areas of high strategic importance ;
 - b. Mobilize New Donors, Private Sector and Innovative Financing
 - c. Strengthen Communications and Advocacy: develop and implement an innovative integrated GEO communications and advocacy campaign, better if in Latinamerica the information is released in spanish.

Best regards

Magíster en Ciencias

Gustavo HENRIQUEZ CAMACHO
